

## Airband Fibre Internet Pole Locations

Airband plan to install 18 poles at 11 metres high (9 mtrs above ground) in as indicated by the yellow pins on the map below. Whilst the Neighbourhood Plan requires that cables should be installed in ducts, Airband is permitted to use poles under the Town and Country Planning (General Permitted Development) Order 2016 (amended) England and the Electrical Communications Code (conditions and restrictions Regulations 2003 (amended) without local planning permission being required.

We do not currently know the date of installation but will be liaising with Airband to establish just what they intend to do when and how this relates to the other broadband initiatives (outline in Kat Foxhall's email of 29 May).
